

ACCESS LADDERS

breezway[™]
MAKE THE MOST OF LIFE

Space. The final frontier.

Need more space to store stuff? Well things are looking up.

That void in your pitched roof is probably perfect for parking all those things you need to keep but can't find a place to put. Skis and teddy bears you can't bear to part with, for example.

Up above your garage - or any room of your house where the roof line is high enough - such items can be stored safe, secure and out from under your feet.

A Space ladder is safer than a step ladder

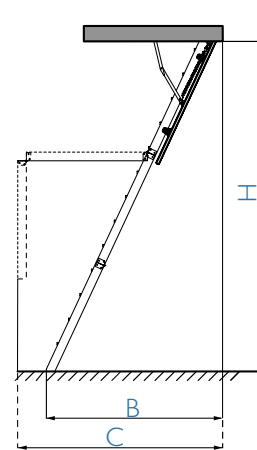

A Breezway Space Ladder gives you quick, easy access to your new roof void storage area.

The unobtrusive trapdoor is spring-hinged for effortless opening and the ladder unfolds as simply as a sofa bed. Any half-handly mum can do it.

The ladder locks securely into place when fully open and includes grooved anti-slip treads. Plastic feet reduce scratching on timber floors.

Breezway Space Ladders are built tough for frequent use and have a load capacity of 160 kgs.

Note to DIY installers - We'll recommend engaging a qualified builder for advice on ceiling load bearing capability. Also, check with your local authorities in regard to permits and approvals.
