

Designing For Commercial

Natural ventilation is a key passive design strategy for commercial buildings. Breezway Altair® Louvre Windows maximise airflow and connect indoor and outdoor spaces, creating healthier, more comfortable workplaces and community spaces.

OVER 3 GENERATIONS OF LOUVRE EXPERIENCE • 90 YEARS • BREEZWAY LOUVRE WINDOWS

KEY BENEFITS

Healthier Indoor Environments

Fresh air can be captured from multiple directions and circulated throughout commercial spaces to support occupant comfort.

Energy Performance

Natural ventilation supports passive cooling strategies and can help reduce building energy consumption.

Proven Performance

Extensively tested to extreme conditions that meet and exceed Australian Standards for Windows in Buildings.

Design Flexibility

A broad range of frame systems, blade types, colours and configurations provides flexibility across commercial applications.

Strong & Safe

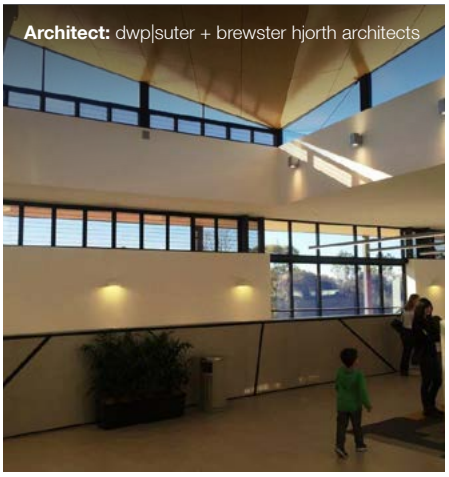

Durable non-corrosive materials provide long-term reliability while the Stronghold® System ensures fall prevention compliance.

Automated Ventilation

Award winning Powerlouvre™ System integrates with building management systems for intelligent ventilation control.

DESIGNED FOR PERFORMANCE

From contemporary office spaces and community facilities to industrial developments, visitor centres and retail environments, Breezway Louvre Windows help designers deliver naturally ventilated buildings that balance performance, sustainability and occupant comfort

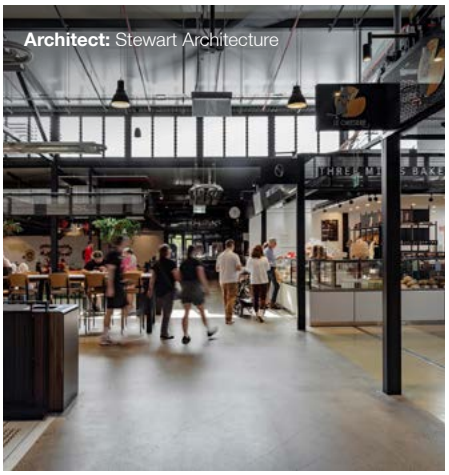

Maximise fresh air movement throughout buildings.

Support passive design and sustainability targets.

Increase access to daylight and outdoor views, reducing reliance on energy costs.

Integrate seamlessly into contemporary building management systems.

Fully compliant with AS2047 and meets fall prevention requirements.

Deliver long-term durability in exposed environments.

BOOK A CONSULTATION

Our Breezway louvre experts can help with design ideas, ventilation solutions and technical advice to support your projects.
