

Designing For Multi-Residential

As urban density continues to increase, providing access to fresh air, natural light and a connection to the outdoors has become an important consideration for occupant wellbeing.

Breezway Altair® Louvre Windows help architects and designers create healthier living environments through natural ventilation while integrating seamlessly into contemporary building design.

OVER 3 GENERATIONS OF LOUVRE EXPERIENCE
90 YEARS
BREEZWAY LOUVRE WINDOWS

KEY BENEFITS

Maximum Airflow

Open twice as wide as traditional windows to maximise fresh air and circulation within a building.

Light & Views

Maintain access to natural light and outdoor views while supporting ventilation performance.

Tight Sealing

Protection from weather and external noise contributes to greater thermal comfort.

Flexible Design

A comprehensive range of frame, blade and operating options enables tailored solutions for diverse project requirements.

Safe & Secure

Stronghold® System assists with fall prevention compliance while maintaining large ventilation openings and additional year-round living space.

Automated Operation

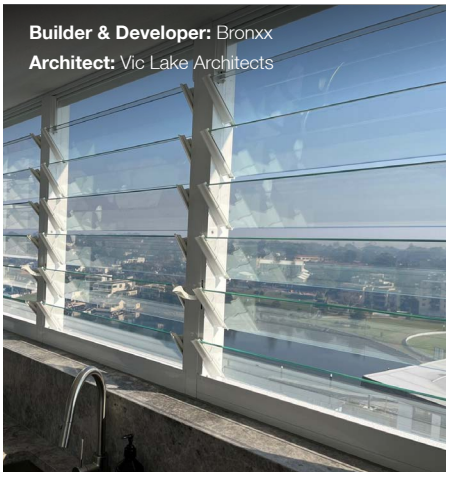

Powerlouvre™ System enables climate-responsive ventilation based on temperatures and timed schedules.

DESIGNED FOR BETTER LIVING

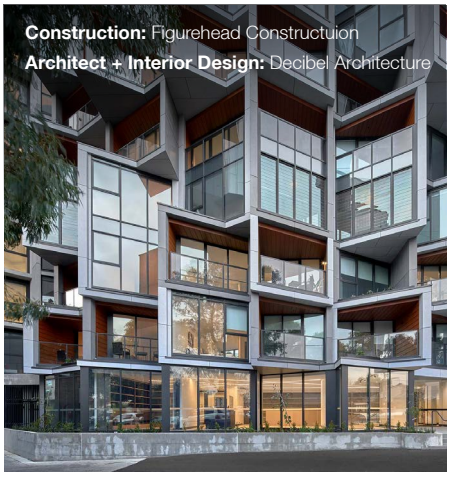

From luxury apartments and waterfront residences to large-scale mixed-use developments, Breezway Louvre Windows help create naturally ventilated living spaces that balance performance, comfort and contemporary design.

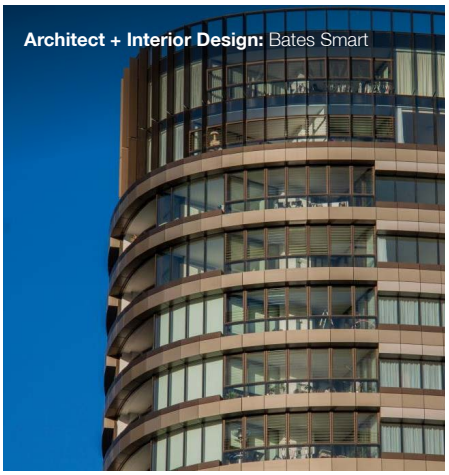

Maximise natural ventilation for improved occupant comfort.

Increase access to daylight and outdoor views.

Fully compliant with AS2047 and meets fall prevention requirements.

Deliver long-term durability in exposed environments.

Support sustainable building design.

Enhance façade performance and aesthetics.
