Aneeta Sashless Windows are consistently specified by architects, building designers and home owners.

An unobtrusive view together with the practicality of an operable window best describes an Aneeta Sashless Window, and they are suitable for all building environments.

All our single glazed systems provide the overlapping of glass when opening or closing the systems while the simplicity and sleek look define the Aneeta brand.

Aneeta Sashless Windows are designed to accommodate the uniqueness of every building environment providing a versatility for all new or existing projects.

Aneeta Sashless Windows are the brand of choice among Australia's architects, building designers and home owners. For more information please contact one of our offices or contact us online: aneetawindows.com

The 2 Pane Vertical Slider remains Aneeta's most popular product for residential and commercial projects.

When researching an alternative to traditional double hung windows, the Aneeta 2 Pane sashless system with its slimline design provides an excellent option that enhances the overall aesthetic of the window.

Our 2 Pane system provides the maximum viewing area possible and includes our unique centre fin design feature that eliminates "rattle" and provides a superior weather rating of the window.

Able to be locked in the open and closed position the double hung counterbalanced system is easy to operate and provides for increased ventilation.

Glass Options

6mm or 10mm Single Glazed

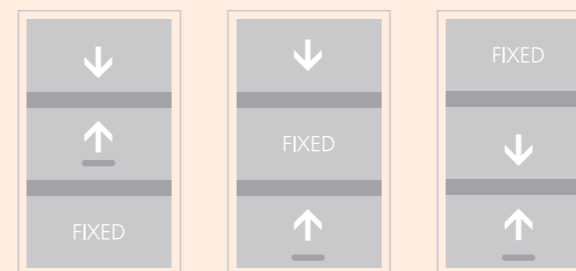

The 3 Pane Vertical Slider has one fixed pane at either the top, middle or bottom location that can be tailored to suit a multitude of applications.

The 3 Pane Vertical system is ideal for installations where a fixed bottom pane is required. Typical examples include garden beds, pools and spas to eliminate water ingress and unwanted pedestrian traffic.

The fixed bottom pane system satisfies window egress requirements on multi-storey projects whilst maintaining the stylish floor to ceiling sashless look.

In addition to the counterbalanced system, the 3 Pane Sashless Window is also available in a single hung server style where the top and bottom panes are fixed allowing the centre pane to move providing air flow through the centre section.

The unique Aneeta 4 Pane Vertical Slider is considered the pinnacle of the Aneeta range.

This system provides 4 panes with the option to alternate the fixed panes providing architects, building designers and specifiers with the flexibility to mix and match. Our most popular arrangement allows the two centre panes to form the opening of the window while the top and bottom panes remain fixed.

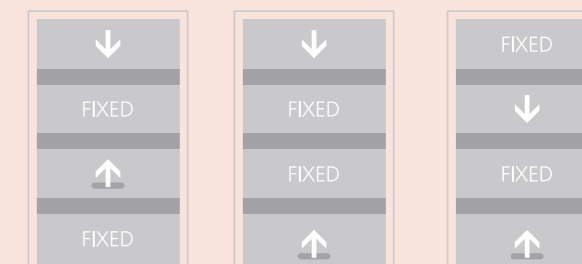

The Aneeta 4 Pane variation has been welcomed and implemented by architects and specifiers in a range of applications including wintergardens, restaurants, cafes and hotels and is extremely popular in building façade projects.
